DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of species I (Figs. 1-3 and 4B) in the reply filed on 12/13/04 is acknowledged.
2. Claims 2-6 and 12-17 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 12/13/04.

Drawings

3. Figure 4A should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Objections

4. Claims 1 and 9 are objected to because of the following informalities:

Regarding Claim 1, on lines 16-17, it appears that the phrase "ground conductor" should instead read as --ground resistance-- since the "additional resistance" is being compared to a characteristic of the ground conductor (i.e. resistance).

Regarding Claim 9, line 3, it appears that the phrase "the substrate" should read as --a substrate-- since the substrate has not been previously claimed.

Also, regarding Claim 9, line 7, it appears that the term "restive" should read as --resistive--.

Appropriate correction is required.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 1, 7, and 8 are rejected under 35 U.S.C. 102(b) as being anticipated by Kubo (JP2002-171105) cited by applicant.

Kubo (e.g. Figs. 3, 5, and 17) teaches a high frequency transmission line including: a signal line strip(2) on top of a dielectric layer (1); a resistive layer (5) (see the machine translation provided with this office action); a ground conductor (3) is connected to the resistive layer by vias (4); the width of the resistive layer is wider than the signal line (Claim 7) and is opposed to the signal line (Claim 8); and inherently the signal line functions equivalently to the claimed invention, especially since it is the same as the claimed structure (Claim 1).

Allowable Subject Matter

7. Claims 9-11 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Sakamoto teaches a noise filter having resistive patterns.
